

COMPETENT AUTHORITY NEWSLETTER

CA Officer Tatiana assisted in organizing the launch ceremony for FISH4ACP, which took place in the MIR Melele room. The substantial industry presence at the ceremony demonstrated the importance of this initiative, and their importance at stakeholders in the movement. As a member of the value chain taskforce, the Competent Authority is also in active engagement with the FISH4ACP initiative.

The CA would like to welcome Competent Authority Auditor Donny Andrike as their newest member. Upon his arrival, Donny was immediately briefed into learning the many facets surrounding the CA's work, including inspections and follow-ups. Donny's first assignment was in conducting organoleptic analyses of fish from the PPF processing facility.

A fundamental concept Donny learned is that when dealing with fish for consumers, the Competent Authority must thoroughly comprehend the risks and microorganisms involved. This is a crucial element towards CA regulatory efforts toward fish handling. All fish exported from the RMI that is intended for human consumption must be safe and free of such hazards and bacteria.

The RMI-flagged purse seiner Jabbuk underwent the CA team's first assessment. Meetings with crew, agents, and managers to discuss the RMI standards for vessels will become routine for the CA, and all RMI-flagged vessels will undergo these checks once they arrive in port.

The Competent Authority team
would like to wish everyone a happy
holidays and a prosperous new year.

See you in 2023!

What's Next?

Please stay tuned for our 2023 events
in the next upcoming quarterly
newsletters and reports. Thank you for
your continued support and
cooperation.
